Introduction

In July 2010 **Bibliography**, the new electronic publication of the Library was launched. The topic of its first issue was “Financial Crisis”. The first attempt to create a reference tool which exploits the existing print and electronic resources of the Library was successful.

Taking into consideration the appeal that this topic had on the user community of the Library, the continuing interest on it, as well as the enrichment of the Library collection with new books on the topic and that much ink is poured in writing articles and studies in scholar journals, it was decided that a revised edition should be published.

The current 2nd edition contains bibliographical references from:

- Books and working papers from the print collection of the Library;
- Articles and papers published during the last two years (2010-2011) located in the electronic resources of the Library, via **360 Search**, the federated search mechanism. The access to full text is allowed only from the Bank’s internal network;
- Open source electronic publications, freely available on the websites of the organizations: Bank of Greece, Bank for International Settlements (BIS), Board of Governors of the Federal Reserve System, European Commission. Economic and Financial Affairs, European Central Bank (ECB) and International Monetary Fund (IMF).
