## Introduction

Each issue of the “*Bibliography*” includes bibliographical references from the Library’s print and electronic resources on a specific topic. The aim of the publication is to facilitate users’ research by providing accurate and current information. The selection of the subjects is relevant to the activities of the Bank of Greece and the general economic developments.

The “*Topic of the Month*” for the current “*Bibliography*” refers to the “[Housing market](#)” from the aspects of residential housing, investments, prices, real estate market and construction.

The major incentive for this bibliography is the publication “*Housing market: developments and prospects*”. The volume is the proceedings of a conference organized by the Bank of Greece on 29 April 2009 under the same topic.

The current issue is divided into three parts:

1. selections of the Library’s catalog;
2. selections of full-text articles from the Library’s electronic resources retrieved from **360 Search**, the federated search mechanism;
3. other resources from the World Wide Web.
