5. Ερωτήσεις

1. Εισαγωγή

το T2TRIS

- ◆ είναι ένα web-based εργαλείο για την ανταλλαγή TARGET2 testing πληροφορίας ανάμεσα στις Εθ.Κ.Τ. και στα Π.Ι. που συνδέονται στο TARGET2 υπό την εποπτεία τους
- ◆ χρησιμοποιείται για τη διάχυση
 - της πληροφορίας που σχετίζονται με τις δοκιμές χρηστών TARGET2 και
 - της τεκμηρίωσης σχετικά με τις διαδικασίες δοκιμών και χρήσης του TARGET2
- ◆ θεωρείται ένα εργαλείο σχεδιασμού που επιτρέπει στους χρήστες να ανταλλάσσουν με τις Κ.Τ. πληροφορίες σχετικά με την πορεία και το συντονισμό των δοκιμών με ομοιόμορφο τρόπο
 - παρέχει όλη την πληροφόρηση στα Αγγλικά
 - εμφανίζει τα τελευταία νέα άμεσα στην αρχική σελίδα
 - επαναλαμβάνει ολοκληρωτικά το περιεχόμενο του *TARGET2 User Testing Guide*

Το T2TRIS είναι:

- ◆ Δομημένο με μια λογική σειρά.
- ◆ Διαχωρισμένο ανάλογα
 - με τις φάσεις των δοκιμών (διασύνδεσης, λειτουργικότητας, κ.α.)
 - με την ομάδα μετάπτωσης (Group I, II, III)
- ◆ Χρήσιμο και απαραίτητο για το σχεδιασμό και το συντονισμό των δοκιμών χρηστών TARGET2
- ◆ Συνεχώς εξελισσόμενο:
 - προσθήκη ανακοινώσεων και
 - εγγράφων τεκμηρίωσης

3. Πρόσβαση

**Το T2TRIS είναι προσβάσιμο μέσω
της ασφαλούς ιστοσελίδας:**

<https://target2.ecb.int/home/html/index.en.html>

URL: <https://target2.ecb.int>

User name: t2user

Password: VBj mspRR7

4.1 Ξεκινώντας – Η Αρχική Σελίδα

The screenshot shows the homepage of the T2TRIS project website. At the top, there is a navigation bar with links to Home, Sitemap, Links, FAQs, and Disclaimer. Below the navigation bar is a banner featuring a bridge and the word 'EURO'. To the right of the banner, there is a sidebar with links to 'ICM demo', 'User detailed functional specifications (UDFS)', 'UDFS', 'Single Shared Platform', and 'Test Registration'. The main content area contains a section titled 'Latest News' with several entries. One entry is highlighted with a red arrow pointing to it. Another red arrow points from the sidebar link 'Test Registration' to the same news item. The news items include:

- 31/01/2007 - T2TRIS made available to credit institutions and other users
- 23/01/2007 - The calendar for the months May, June and July can be consulted for details
- 16/01/2007 - T2TRIS is now available for testing by the CBs (Deadline COB 23.01.07)
- 16/01/2007 - During the test phase you should send your comments to ECB's TARGET Cebamail only (attention of Otto Wolters)
- 16/01/2007 - The Reporting/Registration function will produce an Email to your respective Contact Person(s) of your CB (choose only the CB you belong to!)
- 16/01/2007 - Detailed test cases for interoperability testing [pdf 1,3 mB](#)
- 22/12/2006 - Detailed descriptions of connectivity test cases [pdf 135 kB](#)

At the bottom left, there is a section titled 'About this website' with a detailed description of the T2TRIS tool. The bottom right corner of the page shows the URL 'https://target2.ecb.int/'.

Η Αρχική Σελίδα

Η αρχική σελίδα του T2TRIS εμφανίζεται όταν εισέρχεστε στο εργαλείο. Από εδώ μπορείτε να πλοηγηθείτε σε όλες τις υποεπιλογές (υπο-μενού)

Εδώ βρίσκονται τα **τελευταία νέα** και οι ανακοινώσεις που **χρήζουν ειδικής προσοχής**.

Είναι, επίσης, δυνατή η άμεση πρόσβαση σε χρήσιμους συνδέσμους (links) από εδώ (για παράδειγμα στο TARGET2 User Testing Guide ή στον ιστοχώρο του SWIFT).

4.2 Τεκμηρίωση - Documentation

The screenshot shows the ECB Project website for T2TRIS users, specifically the Documentation / General page. The page title is "TARGET2 Test Related Information System (T2TRIS)". The left sidebar contains a "Documentation" menu with links to Connectivity Testing, Interoperability Testing, Country Testing, Business Day Testing, and Free Testing. The main content area has a "Table of content" section with a "Introduction" item. The "Introduction" section contains a list of topics such as Scope of user testing, Migration groups, Phases of user testing, Roles and responsibilities, Availability of the test environment, Volume limitations, Usage of BICs, Certification testing and test environment, Incident Management, and Training. Below the "Introduction" section is a "Scope of user testing" section. To the right of the main content area, there is a vertical sidebar with icons for ICM demo, User detailed functional specifications (UDFS), UDFS, Single Shared Platform, Test Registration, and a Test registration section with several checkmarks.

Η επιλογή «Documentation» του μενού αναφέρεται στο **κεφάλαιο 1** του «User Testing Guide».

Εδώ λαμβάνουμε πληροφορίες για:

- ◆ Το σκοπό του user testing
- ◆ Τα migration groups
- ◆ Τις φάσεις του user testing
- ◆ Τους ρόλους και τις ευθύνες
- ◆ Τις ώρες λειτουργίας
- ◆ Τις οδηγίες για τη χρήση των BICs
- ◆

Επιπλέον μπορείτε να αναζητήσετε πληροφορίες κατευθείαν για οποιαδήποτε από τις φάσεις δοκιμών

Επιπλέον μπορείτε να επισκεφτείτε οποιαδήποτε φάση δοκιμών

4.2.1 Δοκιμές Διασύνδεσης (II)

Documentation – Connectivity Testing

The screenshot shows a Microsoft Internet Explorer window displaying a page titled 'Documentation / Connectivity Testing'. The page content includes:

- Preconditions for starting the connectivity testing**:
 - Before the start of connectivity testing, the following entry criteria have to be met in addition to those mentioned before:
 - Each user should have the required software for accessing SWIFTNet FIN, SWIFTNet FileAct, SWIFTNet InterAct and SWIFTNet Browse installed.
 - The service code TGT must be entered into field 103 of the user header for payments to PM, to grant the payment flow via SWIFTNetFin Y-Copy.
 - The following two preconditions are applicable only to participants not yet migrated to SWIFTNet phase2 (PKI):
 - Bilateral keys must be exchanged according to the participant's profile with the SSP as central institution for the following BICs:
 - for CUG PM: TRGTXEP0,
 - for CUG HAM: TRGTXEH0,
 - for CUG CBT: TRGTXEC0.
 - The TARGET2 patch offered by CBT vendors must be installed on the SWIFT interface in order to send/receive messages with pre-agreed MAC.
 - In the event the user has already migrated to SWIFTNet phase2, the appropriate settings in the RMA required for PKI must be made.
- Test participation and support**:

Each CB will offer the necessary support to its user community with regard to participation in the TARGET2 user testing. For details, please refer to the specific information accessible via the TARGET2 testing website of your CB. It is expected that users make use of these opportunities offered by the CBs.
- List of connectivity test cases**:

The following table provides an overview of all connectivity test cases defined and can be found in the downloadable pdf file. The detailed test case descriptions can be found in Annex 1.

Annex 1
List of connectivity test cases
Detailed descriptions of connectivity test cases
Detailed descriptions of connectivity test cases
- Reporting of test results**:

All applicable connectivity test cases must be completed **successfully** before the user is allowed to move to the next test phase, the interoperability testing. Successfully means that the expected results as defined in the detailed test case description were achieved. For this purpose, the user must report the successful completion of its connectivity testing to its national service desk, using a standardised form accessible via T2TRIS. Also, test cases which cannot be performed at all, or continuously fail should be reported to the national service desk using the same channel.

Interoperability Testing

Table of content

- Scope and aim
- Preconditions for starting the interoperability testing
- Test participation and support
- List of interoperability test cases
- Reporting of test results

Scope and aim

Interoperability testing, the second user test phase, must ensure that the respective participant can participate in TARGET2 by using all relevant functionalities of the SSP modules and, if applicable, in the CB's respective proprietary systems. All TARGET2 users should be able to send and receive correctly formatted information. A different set of test cases is assigned to the user depending on their user profile (direct participant, CB customer, HAM account holder, AS). The optional SSP modules chosen by the respective CB and the optional functionalities chosen by the participant affect the overall number of test cases to be performed.

Test cases for interoperability testing are developed according to the following principles:

- The TARGET2 users should be able to verify all functions implemented, in terms of hardware/software, which are part of the user's interfaces with T2. Testing of proprietary systems should be included in addition to the SSP modules.
- For critical functions available to all TARGET2 users (e.g. payment processing, cancellation of payments), **mandatory** test cases are defined, which each participant has to complete and report on to the national service desk as part of the certification process.
- For critical functions, which are available only to a subset of TARGET2 users, conditional test cases are defined. Typically **conditional** test cases cover features provided by an optional module (e.g. HAM) or additional services offered to participants (e.g. liquidity pooling). If applicable to the participant, a conditional test case becomes **mandatory** and the test results must be reported as part of its certification process. Otherwise the participant does not have to run it.
- In addition to the mandatory and conditional test cases, a number of test cases classified as **optional** will be provided within T2TRIS only. Besides

4.2.2 Δοκιμές Διασύνδεσης (II)

Documentation – Interoperability Testing

The screenshot shows a Microsoft Internet Explorer window displaying a page from the ECB Project website. The title bar reads "ECB: Project website for T2TRIS users - Documentation / Interoperability Testing - Microsoft Internet Explorer provided by Euro". The address bar shows the URL "http://217.110.182.53/t2tris/documentation/documentation.interoperability_testing.en.html?link=fb5a46d169f121cc41c47cd31b7ec31". The main content area contains several sections:

- Preconditions for starting the interoperability testing**: A note stating that users connecting to the ICM server in application-to-application (A2A) mode should test the respective functionality both in user-to-application (U2A) and A2A mode. It specifies that test cases are described according to the U2A approach (using ICM), but contain a reference to the respective XML structures to be used in A2A mode. It notes that it is the responsibility of the user to 'translate' the (U2A mode) test case description in a way that it can be tested in A2A mode.
- Test participation and support**: A note that each CB will offer the necessary support to its user community with regard to participation in the TARGET2 user testing. It refers to specific information accessible via the TARGET2 testing website of your CB.
- List of interoperability test cases**: A note that the following table provides an overview of all mandatory and conditional interoperability test cases defined. Detailed test case descriptions can be found in the downloadable pdf-file (in the same order) in Annex 2.
- Annex 2**: A list containing three items:
 - List of interoperability test cases
 - Detailed test cases for interoperability testing
 - Detailed test cases for interoperability testing
- Reporting of test results**: A note that all mandatory and, if applicable, conditional interoperability test cases must be completed successfully before a user is allowed to move to the next test phase, the country testing. This means that the expected results as defined in the detailed test case description were achieved. For this purpose, the user must report the completion of all mandatory and, if applicable, conditional interoperability test cases to its national service desk using the form provided in T2TRIS. All interoperability test cases, both successful and those which cannot be performed at all, or continuously fail, should be reported to the national service desk.

TARGET2 Test Related Information System (T2TRIS)

Home > Test Calendar > Migration groups

Test Calendar General Overview Migration Group

Migration groups

For the migration to TARGET2, the Eurosystem opted for a country window approach, allowing TARGET users to migrate to the SSP in different waves and on different pre-defined dates. Each wave will consist of a group of central banks and their respective national banking communities. Central banks will only be allocated to the first three groups while the fourth one will be reserved for contingency.

The composition of the migration groups is shown in the table below.

Migration groups

Group 1	Group 2	Group 3	Group 4
19 November 2007	18 February 2008	19 May 2008	15 September 2008
Austria Cyprus Germany Latvia Lithuania Luxembourg Malta Slovenia	Belgium Finland France Ireland The Netherlands Portugal Spain	Denmark Estonia ECB Greece Italy Poland	Reserved for contingency

Further information on the national migration profiles of individual countries can be found [here](#).
